

CEREBRAL RINGS[®] PUZZLER

side view

CEREBRAL RINGS[®]

To take the puzzle apart follow these instructions:

Notice from the face view you see 3 cuts; disassembled there are 3 identical parts with sliding buttons. The buttons can be removed, but must be placed back in the proper position, to assemble.

STEP A

Regardless which face of the puzzle you work from, push the red button "A" shown in the side view.

STEP B

Push the red buttons "B" to the middle level as shown in side view.

STEP C

Once the buttons are at the proper levels, place fingers of the right hand at the X points on the top layer, and place left hand fingers at the Z points on the top layer. Then, with force, slide sections in the direction as shown by the arrows in the side view, and puzzle will separate into the three sections.

TO RÉASSEMBLE: (Buttons must be in the same position) just stack and reverse the slide action.
